

A Residential Memory Care Community

WINDSONG

at Eola Hills

SALEM, OREGON

Welcome to WindSong at Eola Hills, a Montessori Inspired Lifestyle® Community.

OUR MISSION is to foster purposeful and meaningful lives for those with Alzheimer's and other dementias through the use of the Montessori Inspired Lifestyle.®

CREATING MOMENTS *from* MEMORIES™

WindSong at Eola Hills

Located in beautiful Salem, Oregon, WindSong at Eola Hills is a state-of-the-art, 56 suite memory care community with all the comforts of home.

Each resident enjoys well-appointed accommodations with the option of a shared or private bathroom. Residents are encouraged to personalize their rooms making them a special extension of home.

Meaningful Moments

Our professional and caring staff believe every resident is complete with deeply rooted memories, wisdom from a lifetime of experiences, and the capacity for joy, love and spirituality. While memory and abilities fade, we believe each person deserves to be honored as a whole individual for life.

Using the *Montesorri Inspired Lifestyle Approach*, we are able to connect with individuals each day through deeply personal and meaningful interaction. The precious moments where connections are evidenced by smiles and bright eyes are later recreated and built upon for a foundation of ongoing success.

Our staff is trained in the *Montesorri Inspired Lifestyle Approach* to caring for those with dementia. This specialized training, dedication, and unparalleled compassion endears them to the remarkable people they serve.

Opportunity! Ask the resident

Assumptions are often made about individuals who have been diagnosed with dementia. We assume that they can no longer make choices, have new experiences or develop relationships. This is simply not the case. At WindSong at Eola Hills, we offer our residents the opportunity for control and choice by simply asking them. A Montessori based community is about providing the pathways that enable our residents to once again actively engage in their lives.

Your family is our family

We believe that our residents, loved ones and staff are all a part of the WindSong community. We encourage relatives to work with us to ensure a good quality of life for our residents. This collaborative relationship is the best arrangement possible.

We are a home, bedded in a community, connected to the larger world

WindSong communities are designed to create an environment that is reflective of the people who live within it. A community does not exist alone. It involves interacting with other communities, other people, other cultures and other generations. We ask ourselves, if not for this disease, what would their lives be like? Then we try to create those experiences in whatever way we can.

The prepared environment

We create communities where people are enabled and supported to be independent. The WindSong environment is designed with intent. Memory boxes outside of apartments and directional signage on the walls assist residents in finding their way. Also, personalized apartments allow residents to surround themselves with all the comforts of home. Our goal is to create the kind of place we would all want to live.

Living with purpose

WindSong at Eola Hills is a place where our residents feel they belong, they have choices, can make decisions, contribute, and have a sense of purpose and a reason to get out of bed in the morning. Our residents have the opportunity to be on committees, plan celebrations, greet and support new community members and contribute to our monthly newsletter. We like to say, if we can imagine it, we can make it happen.
